

To Whom it may concern, As a cross country driver of commodities XMradio and the services that are offered are well used and needed tools. Being able to use one tool to find weather and traffic information, as well as political, is one convenient but it also makes my travels through this beautiful country a whole lot safer. I do vote and what the government does reflects on that right and honor of how I vote.

Thank-you for your time.

JC McCawley II
